ASSEMBLY INSTRUCTIONS

80500 Freedom Walker

Perform the following steps in the order listed. Refer to picture above.

Assemble Casters and Outriggers

1. Install one caster into each of the female fittings on the bottom frame section.
2. Secure each caster by inserting one 1/2" screw into the pre-drilled pilot hole on the female fitting. Tighten with a Phillips screwdriver.
3. Insert the outrigger into each side of the walker next to the casters: connect the front section of the outrigger (three-way fitting) into the front section (four-way fitting on the frame). Secure the outrigger with one 1/2" stainless steel screw. Insert the vertical support legs into the outrigger (4 each of leg piping). Secure each vertical support leg with one 1/2" stainless steel screw.

Assemble Adjustable Seat

1. Align bottom of the seat section fittings with the top of the 1" PVC pipe that extends out from the lower base near the casters. Slide the 1" PVC pipe vertically into the seat section until the last vertical adjustable hole is exposed. The four wire lock pins fit into each fitting that accommodates the 1" PVC pipe. The T fittings and the four four-way fittings take 1 wire lock pin each to secure the 1" PVC pipe from moving.
2. Connect the seat section with the bottom half of the 1" PVC pipe. The 1" PVC pipe needs to be secure with the fittings located above the casters.
3. Secure the 1" PVC pipe with one 1" stainless steel screw.

Assemble Parallel Arms

1. Facing the walker, insert the right side arm into the front section T fitting and back section four-way fitting. Insert the left side arm into the front section with the red strap into the T fitting, back section insert into the four-way fitting.
2. Secure both arms with one each 1" stainless steel screw.

Assemble PVC Back Section

Add the PVC back to the rear section of the arms. Secure the PVC back into the female fitting with one each 1" stainless steel screw.

Assemble Swing Gate

Includes one parallel pole (longest) and two vertical poles. The parallel pole serves as the main swing gate. The other two serve as pivot points for the swing gate.

1. Slide the parallel pole into the taller pivot pole. Facing the walker, insert the pivot pole into the T fitting on the right side. Secure the vertical pole with one 1" stainless steel screw.
2. Facing the walker, insert the shorter pivot pole into the T fitting into the left side. Secure with one 1" stainless steel screw.

⚠ WARNING: The red swing gate strap serves as additional security for the swing gate. The strap must be secured to the gate when the walker is in use.

Assemble Swing Gate Strap

The pre-assembled swing gate strap is attached to the base of the walker seat. Unroll the strap to finish assembly and loop the strap on the swing gate. Secure the swing gate with the red swing gate strap by snapping it to the swing gate.

The red swing gate strap must be on the right side of the walker.

⚠ WARNING: Ensure all screws and adjustable parts are securely installed before use.
